

Welcome!

Thank you for your interest in the EECS Department's Computer Science program in the College of Engineering. The fast rate of innovation in computer technology has created many new, exciting opportunities for students with Computer Science undergraduate degrees. Employment opportunities include: software development, game design, medicine, computer graphics, security, business management, consulting, computer systems analysis, data communications administration, robotics, artificial intelligence, knowledge engineering, hardware development, and many others. Major employers of recent graduates include many prominent U.S. corporations and research laboratories, such as Amazon, Apple, AT&T, Boeing, Cisco, Deutsche Bank, Electronic Arts, Facebook, Google, IBM, Intel, Microsoft, NASA, PricewaterhouseCoopers, and many others. In addition, an undergraduate degree in Computer Science provides opportunities for masters, doctoral, and professional studies in various fields.

Computer science is an exceptional field. Computers have been around for only 60 years while most other scientific disciplines have been around for centuries. Progress in computer science has been extraordinarily rapid during this period, and computers have had a profound impact on society. (Can you envision life without text messaging, social networking, and Wifi?) Computer science research has provided much of the intellectual foundation and creative energy that fueled that transformation, and it continues to be an extremely exciting field.

Computer Science—College of Engineering (CS-Eng) Declaration Requirements

To declare a major in CS-Eng, you must be a College of Engineering student and:

- (1) Have completed at least one full term at UM Ann Arbor
- (2) Have an overall UM GPA of 2.0 or better in courses taken at the UM Ann Arbor campus and be in good standing
- (3) Have completed or earned credit by exam or transfer for at least one course in each of these categories:
 - a. Calculus (e.g. Math 115, 116 or 156)
 - b. Calculus-based physics lectures (e.g. Physics 140 or 160) or chemistry lectures (e.g. Chem 130)
 - c. Required engineering courses (Engr 100, 101, or 151)

If you are interested in declaring a CS-Eng major and do not meet these requirements, please schedule an appointment with the CS-Eng Chief Program Advisor (CPA) to discuss your situation.

Getting Advice and Information

If you are a CS-Eng Major or considering becoming one, **you should meet with a CS-Eng Faculty Advisor** every semester, even if you know what courses you want to take. There may be options or constraints of which you are unaware. Frequent meetings with an advisor will help ensure that you get the most out of your education here and that there are no surprises when you apply for your diploma. You can schedule an advising appointment online.

Check the EECS Advising web page for information about registration procedures, course offerings, book lists, time schedules, advising hours, and career information. You may also e-mail the CS Undergraduate Advising staff or the CS-Eng Chief Program Advisor at csengadvisor@umich.edu.

Computer Science Undergraduate Advising Office, 2808 BBB Bldg., ugadmin@eecs.umich.edu, (734) 763-6563.
EECS Undergraduate Program website: www.eecs.umich.edu/eecs/undergraduate.

This document covers rules and advice for the CS-Eng program for Fall 2012 – Summer 2019. Your program is determined by the rules that were in effect when you entered the College of Engineering. If you entered the College of Engineering before Fall 2012, you are covered by a different set of rules.

THIS CS-ENG GUIDE APPLIES ONLY TO COLLEGE OF ENGINEERING STUDENTS.

EECS offers two paths to an undergraduate degree in Computer Science: one for students in the College of Literature, Science & the Arts (CS-LSA), and another for students in the College of Engineering (CS-Eng). For more information, please see http://www.eecs.umich.edu/eecs/undergraduate/cs_lsa_vs_engr.html

(Fall 2012–Summer 2019) Computer Science–Eng CS-Eng & CoE Program Requirements & Grade Policies

College of Engineering Core Requirements

1. Engineering 100, and [Engineering 101 or Engineering 151]
2. Chemistry 125, Chemistry 126, Chemistry 130 or Chemistry 210, Chemistry 211
3. Physics 140, Physics 141, Physics 240, Physics 241
4. Math
 - a. Math 115 or Math 120 (AP)
 - b. Math 116 or Math 121 (AP)
 - c. Math 214 (can also be satisfied with Math 217, Math 417 or Math 419)
 - d. Math 215 or Math 216 (If both Math 215 and Math 216 are taken, Math 216 can count as a Flexible Technical Elective.)
5. Intellectual Breadth: rules for this College requirement can be found in the Bulletin: bulletin.engin.umich.edu/ug-ed/reqs/#subnav-11
6. General Electives: 15 credits are “required”; CoE degrees require 128 total credits, and more or fewer GE credits may be needed to achieve this total depending on individual factors in a student’s record.

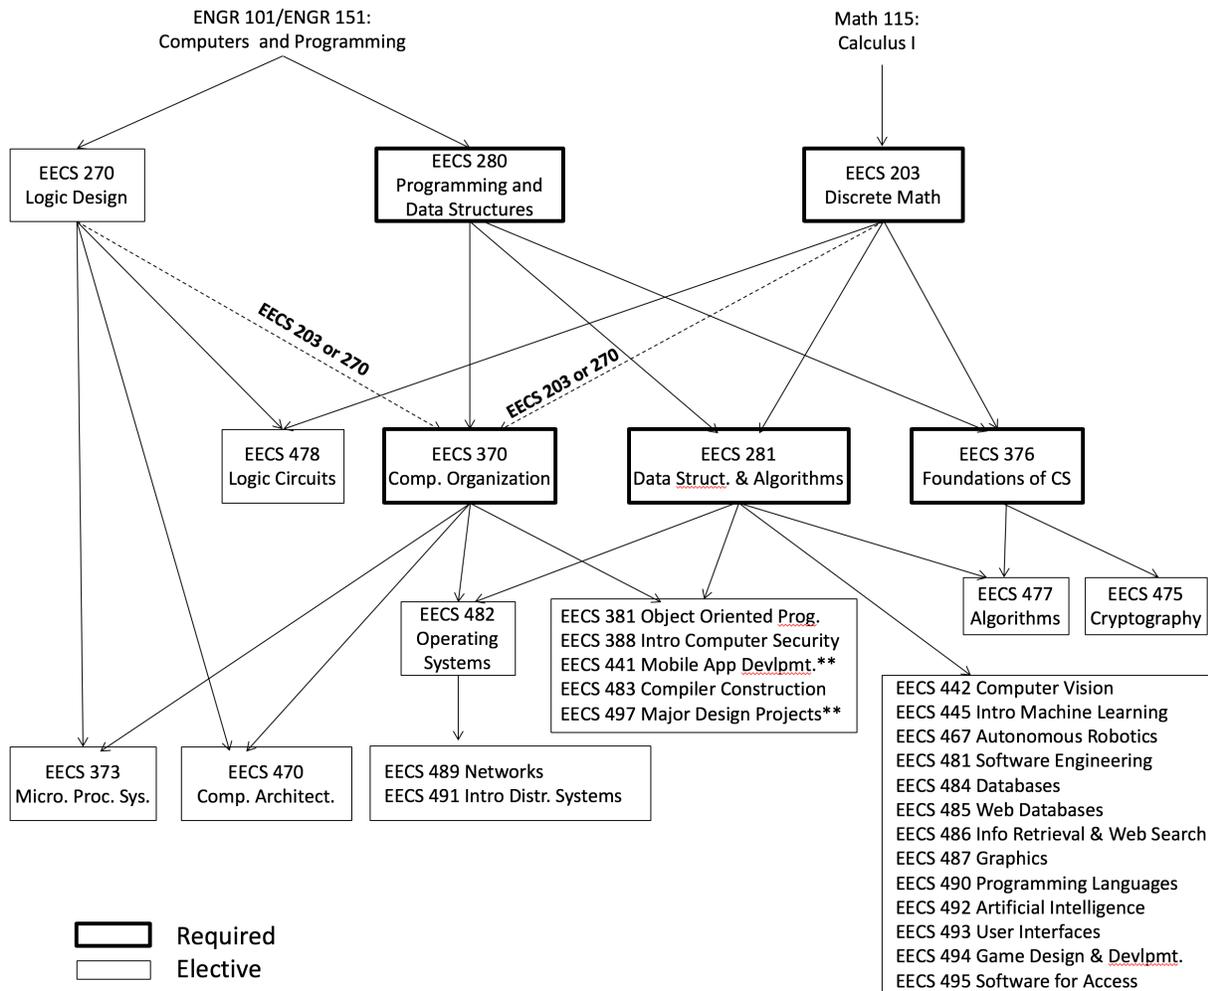

Computer Science in Engineering Program Requirements

1. **Program Core:** All of the following courses are required:
 - a. Computer Science: EECS 203 (or MATH 465/565*), EECS 280, EECS 281, EECS 370, EECS 376, and EECS 496 (**Note that MATH 465/565 require significantly more mathematical background than does EECS 203. Speak to an advisor before selecting these courses.*)
 - b. Probability and Statistics: STATS 250 or STATS 280 or STATS 412 or STATS 426 or EECS 301 or EECS 401 or IOE 265. (IOE 265 is generally open only to undeclared or IOE students. Students with credit from Statistics AP exams should pursue STATS 280 for this requirement. *Dual major/dual degree students, see dual majors document (2808 BBB) for possible substitutions.*)
 - c. Technical Communications: TCHNCLCM 300
2. **Technical Electives:** A minimum of 26 additional credits of technical electives is required (27 credits if the course used for the CS MDE is 3 credits):
 - a. At least 16 of these credits must be in approved *Upper Level CS Technical Electives* (a list of approved courses is located on page 5).
 - b. The remainder of the technical elective credits may be chosen from the approved *Flexible Technical Electives* lists (CS list is located on page 5; Flex Techs in other fields are listed online at eecs.umich.edu/eecs/undergraduate/computer-science/electives.html). These are courses in engineering, mathematics, or science that are approved as appropriate for CS students.
3. **Major Design Experience (MDE):** The MDE is a capstone design project that is recommended to be taken during one of your final two semesters. It is required for the MDE to be taken alongside the technical writing course as detailed below:
 - a. A CS MDE design project course: EECS 441 or EECS 467 or EECS 470 or EECS 473 or EECS 494 or EECS 495 or EECS 497 (some EECS 498 sections may be approved as MDE; see website). Students who are interested in using a non-CS course for their MDE requirement must meet with the Chief Program Advisor for permission prior to enrolling (note: 18 credits of CS coursework among the Technical Electives are still required).
 - b. Writing and oral presentation: TCHNCLCM 497 or TCHNCLCM 496.

EECS Grading & Repeat Policies

A grade of C- or below in any of the College Core, Program Core, or Technical Electives is not considered a passing grade and the course must be repeated or substituted with another. [Note: Grades of C- through D- are acceptable for Intellectual Breadth or General Electives.] Students are limited to attempting each of the three 200-level courses (EECS 203, EECS 280, EECS 281) at most twice. An attempt includes, but is not limited to, a notation of any letter grade (“A-F”), Withdraw (“W”), Pass/Fail (“P”/“F”), Transfer (“T”), or Incomplete (“I”) posted on the U-M transcript. At most one attempt from Summer 2014 and earlier will count against this limit. Exceptions to this rule can be granted by the CS-Engineering Chief Program Advisor *only in extraordinary circumstances*.

(Fall 2012–Summer 2019) Computer Science–Eng Prerequisite Chain and College Policies

**EECS 441 and EECS 497 also require successful completion of at least 4 credits of ULCS prior to electing one of these courses.

College of Engineering Policies

Intellectual Breadth: Intellectual Breadth requirements are complex and not always intuitive. See the CoE Bulletin for details: <http://www.engin.umich.edu/college/academics/bulletin/ug-ed/reqs/#subnav-11>. Further questions about this requirement can be directed to the EECS Undergraduate Advising Office. [Note that **Test Credit for Foreign Languages** (AP credits and credits by exam) at the 100-level count only as general electives.]

Dual degrees: To earn a dual degree within Engineering, you must satisfy the requirements for both programs and take at least 14 additional credit hours of pertinent technical electives beyond either major (142 credits total). You should schedule advising appointments **at both departments** to determine allowable overlap among requirements.

Pass/Fail is only allowed for Intellectual Breadth requirements and general electives. You may take at most 2 courses pass/fail per term (1 during Spring or Summer half-terms) and at most 14 credits total. This can be a good way to maintain a good GPA while exploring different types of courses within the University.

Transfer credit: The College of Engineering maintains a list of approved transfer courses from many other institutions at <http://www.engin.umich.edu/transferdatabase>. Courses that do not appear on this list may still transfer but will need to be reviewed. *You must take 50 credits hours (including 30 hours of 300-level or above of technical credits) on the Ann Arbor campus.*

(Fall 2012–Summer 2019) Computer Science–Eng CS-Eng Sample Schedule

Below is an eight-semester (four-year) plan to help students envision how requirements may fit together over the course of their time at Michigan. This plan is only a sample; students must respect prerequisite chains, but it is not necessary to follow the below plan exactly. For more planning assistance, students should schedule an appointment with a Faculty Advisor on the EECS Undergraduate website.

	Total Credits	Terms							
		1	2	3	4	5	6	7	8
Subjects Required by all Programs (55 hours)									
Mathematics 115, 116, and 214 ¹	12	4	4		4				
Mathematics 215 or 216 ²	4					4			
Engineering 100, Introduction to Engineering	4		4						
Engineering 101, Introduction to Computers	4	4							
Chemistry [125/126 and 130] or Chemistry [210 and 211]	5	5							
Physics 140 and Lab 141	5		5						
Physics 240 and Lab 241	5			5					
Intellectual Breadth	16	4	4		4	4			
Program Subjects (26 hours)									
EECS 203, Discrete Mathematics (or MATH 465/565)	4			4					
EECS 280, Programming and Elementary Data Structures	4			4					
EECS 281, Data Structures and Algorithms	4				4				
EECS 370, Introduction to Computer Organization	4					4			
STATS 250 or STATS 280 or STATS 412 or STATS 426 or EECS 301/401 or IOE 265 ³	3						3		
EECS 376, Foundations of Computer Science	4						4		
TCHNCLCM 300	1						1		
EECS 496								2	
Major Design Experience (6 hours)									
Approved CS MDE course ⁴	4							4	
TCHNCLCM 497	2							2	
Technical Electives (26 hours)									
Upper Level CS Technical Electives ⁵	16						4	4	8
Flexible Technical Electives ^{5,6}	10				4	4			2
General Electives (15 hours)									
	15			3			4	4	4
Total	128	17	17	16	16	16	16	16	14

Notes:

- C- Rule: Among all requirements listed above (with the exception of general electives and Intellectual Breadth), a grade of C- or below is considered unsatisfactory. C or higher is required.
 - Credits from a course may only be used to fulfill a single requirement (no double-counting).
1. The requirements for MATH 214 can alternatively be satisfied by MATH 217, 417, or 419.
 2. If both MATH 215 and MATH 216 are taken, MATH 216 can count as a Flexible Technical Elective.
 3. STATS 250, STATS 280, EECS 301, and IOE 265 are 4 credit courses; if one of these is elected, the extra credit is counted toward general electives.
 4. See page 5 for the current list. Must be taken in the same semester as EECS 496 and TCHNCLCM 497.
 5. See page 5 for the current list.
 6. A maximum of 4 credits of EECS 499/399 (or other upper-level directed/independent study) may count in Flexible Technical Electives; additional will count as general electives. Advisors can verify adherence to this policy in your record.

(Fall 2012–Summer 2019) Computer Science–Eng

CS-Eng Technical Electives

Discuss your elective choices with an EECS faculty member in your area of interest, or with a CS Faculty Advisor. Courses that have been approved as a CS MDE course are highlighted in **bold** in the lists below. Note: An EECS course may only count toward one requirement—either ULCS or MDE, not both.

Upper-Level CS (ULCS) Electives

You must take at least 16 credits of Upper-Level CS (ULCS) Electives from the list below. All technical elective credits can be CS Technical Electives, and we encourage students to take more than the minimum. Any credits you earn in ULCS courses beyond the minimum 16 will count toward your Flexible Technical Electives requirement.

367	Introduction to Autonomous Robotics	482	Introduction to Operating Systems
373	Design of Microprocessor Based Systems	483	Compiler Construction
381	Object-Oriented and Advanced Programming	484	Database Management Systems
388	Introduction to Computer Security	485	Web Database and Information Systems
427	VLSI Design I	486	Information Retrieval & Web Search
442	Computer Vision	487	Interactive Computer Graphics
445	Introduction to Machine Learning	489	Computer Networks
470	Computer Architecture	490	Programming Languages
475	Introduction to Cryptography	491	Introduction to Distributed Systems
477	Introduction to Algorithms	492	Introduction to Artificial Intelligence
478	Logic Circuit Synthesis and Optimization	493	User Interface Development
481	Software Engineering (taken FA17 or after)		

Flexible CS Technical Electives

The following courses are approved as Flexible CS Technical Electives (*Flex Techs in other fields are listed online at eecs.umich.edu/eecs/undergraduate/computer-science/electives.html*). This list includes courses at the graduate level (numbered 500 and above). Students with interests in research, graduate school, or specific areas should discuss graduate course options with the Chief Program Advisor, who may approve graduate courses on a per-student basis for use as ULCS (approval must be obtained prior to registering for the course).

201	Computer Science Pragmatics	574	Computational Complexity
270	Introduction to Logic Design	575	Advanced Cryptography
285	A Programming Language or Computer System	578	CAD Verification of Digital Systems
382	Internet-Scale Computing	579	Digital System Testing
441	Mobile App Development for Entrepreneurs	580	Advanced Computer Graphics
467	Autonomous Robotics Design Experience*	581	Software Engineering Tools
473	Advanced Embedded Systems	582	Advanced Operating Systems
494	Computer Game Design and Development	583	Advanced Compilers
495	Software for Access	584	Advanced Database Systems
497	EECS Major Design Projects	586	Design and Analysis of Algorithms
527	Layout Synthesis and Optimization	587	Parallel Computing
543	Knowledge-Based Systems	588	Computer and Network Security
545	Machine Learning	589	Advanced Computer Networks
547	Electronic Commerce	590	Advanced Programming Languages
567	Introduction to Robotics	591	Distributed Systems
570	Parallel Computer Architecture	592	Advanced Artificial Intelligence
571	Principles of Real Time Computing	594	Introduction to Adaptive Systems
573	Microarchitecture	595	Natural Language Processing

(*467 may be used as ULCS through Fall 2019.)

Note: EECS 398, 498, and 598 are the generic numbers for Special Topics courses. Individual sections sometimes carry approvals as MDE, ULCS elective credit, or Flexible Technical elective credit. Approved requirements for each section are listed online every term at eecs.umich.edu/eecs/academics/special_topics.html.

Elective Groups

The CS program has no official specializations, and we encourage students to take electives across a broad range of topics in computer science. However, if you want to specialize in a specific topic, consider these groupings:

Computer hardware: 270, 373, 427, 470, 478
Computing infrastructure: 482, 483, 484, 489, 491
Intelligent systems: 442, 445, 467, 486, 492

Software development: 381, 482, 484, 485, 493, 494
Theory of computation: 475, 477, 490
Web technology & applications: 285, 388, 485, 486

(Fall 2012–Summer 2019) Computer Science–Eng

General Advice & Departmental Opportunities

GENERAL ADVICE

Mental Health: If you're feeling stressed, depressed, or just need someone to talk to, there are many places to find support on campus: www.rackham.umich.edu/student_life/health_and_wellness/resources/mental_health/

Information from Friends: Your friends can be a good source of information on certain topics, like the workload in courses they have taken. However, they can be an unreliable source of information for details of program and college requirements. For specific questions about program requirements, always check with the advising office rather than relying on word-of-mouth.

Directed / Independent Study and Research: Only 4 hours of directed/independent study or research courses (total across all depts., i.e. EECS, ENGR, IOE, Civil, etc.) can count toward Flexible Technical Electives. EECS 499 is only open to seniors; sophomores & juniors should consider EECS 399 (counts as Flexible Technical Elective credit, up to 4 credits).

Course Sequencing and Workload: Student feedback about workload in CS courses can be found online: eecs.umich.edu/eecs/undergraduate/survey/. There is considerable variance for courses because different students find different aspects of courses challenging (writing complicated programs, understanding math concepts, etc.) Below is a summary guide that synthesizes workload survey data with other relevant course information to estimate workload in each course:

Extremely heavy workload: 281, 373, 381, 467, 470, 473, 482, 494

Heavy workload: 445, 477, 483, 485, 487

Moderate workload: 203, 280, 285, 370, 376, 388, 442, 475, 478, 481, 484, 489, 490, 492

Light workload: 183, 441, 486, 493, 496, 497

CS courses can be more demanding relative to many courses at the University, so we advise students to avoid overloading themselves. For most CS students, a load of 2 CS courses in the same semester is normal, but that can vary based on the combination of CS courses chosen (e.g., a CS course with an extremely heavy load should only be paired with one with a moderate load or less), as well as what non-CS courses are being taken at the same time. We encourage students to talk with faculty advisors and peer advisors if they have questions about the course load they are considering.

EECS 203 & EECS 280: Taking EECS 203 (Discrete Structures) and EECS 280 (Programming) simultaneously often works well, and these are the prereqs for the "gateway" course, EECS 281 (Data Structures & Algorithms).

EECS 281: Take EECS 281 as soon as you can. This is the "gateway" course to all Upper Level CS Courses.

EECS 270 & 370: Many students say that EECS 270 (which counts as a CS Flexible Tech Elective) makes EECS 370 easier. Others say that the 203 prerequisite is good enough and don't want to use a flexible technical elective on 270. You will probably get more out of 370 by taking 270 first, but this is not required.

TCHNCLCM 300 is a prerequisite for TCHNCLCM 497. The Technical Communications department manages all TCHNCLCM courses. Please visit <http://techcom.engin.umich.edu/> for questions or issues with registration of these courses.

DEPARTMENTAL OPPORTUNITIES

Research: A great deal of leading-edge academic research is carried out at UM. If you show that you can do the work, you can get involved in this research as an undergraduate, which will provide you with extraordinarily valuable training for future work in the field. <http://www.eecs.umich.edu/eecs/undergraduate/research/undergrad-research.html>

Teaching—Become an Instructional Aid: The discussion sections for EECS 183, EECS 280, EECS 281, and ENGR 100 (CSE-based topics) are led primarily by undergraduates. As a section leader, you will have the chance to teach the next generation of CSE majors and get them excited about computing.

Mentoring—Become a Peer Advisor: Share your experiences with other undergraduates. If you are interested, check in with the CSE Undergraduate Advising Office for information. Opportunities are available at both the department and CoE levels.

Getting Involved—Join an EECS Student Group: Enhance your undergraduate experience and resume by joining a student group: http://www.eecs.umich.edu/eecs/students/Student_Organizations.html

Getting Experience—Internships, Co-ops, and Job Opportunities: Many companies hire students for internships upon completion of EECS 281 (for some, even after EECS 280!). You can view current CS intern & job opportunities at <http://www.eecs.umich.edu/eecs/undergraduate/index.html>, through the Engineering Career Resource Center (ECRC), <http://career.engin.umich.edu>, or through the fall and winter **Career Fairs**, <http://career.engin.umich.edu/studalums/career-fairs/>.
